

INTELLICON LAB

Executive Summary (2025. 09. 15)

1. Problem Statement

PROBLEM

**Inefficient legal search process,
Unreliable, Inaccurate Results.**

- Difficult to find laws and materials
- Overload of relevant materials
- Misleading or incomplete information
- Lack of personalized knowledge bases

Hallucination Risk in Legal AI: A Critical Problem

~33% Hallucination

Source: Hallucination-Free? Assessing the Reliability of Leading AI Legal Research Tools (2024.05)

2. Solution Overview

SOLUTION

**Accurate,
Evidence-based,
Tailored answers.**

- Provides highly relevant materials
- Builds a personalized knowledge base.

LawGPT

Asia's First Legal QA-LLM

- Legal QA system that provides answers to legal questions
- All answers are supported by evidence (laws, precedents, documents)
- Equipped with an optimized AI module that eliminates hallucinations
 - Major Clients : Korea Electric Power Corp (KEPCO)

RESULT

**Precision-driven results,
Transforming inefficiency**

- Effortless access to curated knowledge
- Accelerated legal discovery
- Maximized operational impact

3. Market Opportunity

- TAM**
AI Software Market Size
- SAM**
Legal AI Software Market, CAGR of 27.64%
- SOM**
The SOM of \$54.9M reflects the school administration segment only

■ With expansion into other legal sectors, SOM is expected to increase significantly.

	Region	Provincial Offices	Local Support Offices
1	Total	17	176
2	Seoul	1	11

SOM Details

- 1. Target (54.9 M)**
 - Total 12,209 institutions (2022)
- 2. Annual Goals**
 - 1) Contact 6 Provincial Offices and 60 Local Support Offices
 - 2) 60% Meetings
 - 3) 30% Pilot Programs
 - 4) 10% Conversion to Paid Service
- 3. Back Data**
 - Based on 10 users, USD 375 per month per user

4. Business Model

The service will be offered in Tiers, with differentiated API usage and charging, available in monthly and annual subscription models.

For Personal / Startups

Enterprise / Institution Plan

5. Competitive Analysis

Issue in LLM	ChatGPT	Mainstream service (Existing RAG-GPT)	LawGPT (Intellicon)
Minimized Hallucination	✓	✓✓	✓✓

Education

2014	UC Berkeley School of Law	IP/IPSL short-term course	completion
2012	Completion of International Dispute Arbitration Expert Training	International Arbitration Act	completion
	The 9th Intellectual Property Training Institute	Patent Law, etc.	completion
	41 st Judicial Research & Training Institute	Passed the 51 st Judicial Examination	completion
2010 ~ 2012	Completion of Intellectual Property Special Training	Intellectual Property Law	completion
1989 ~ 1998	Seoul National University	Life Sciences	Bachelors

Selected Publications & Academic Activities

2016	An Ensemble Based Legal Information Retrieval & Entailment System	JURISIN 2016
2016	A.I. & its impact on legal profession: FUTURE LAWYER	2016 International Judicial Symposium (Supreme Court International Academic Conference)
2016	A.I. & Legal Technology	2016 SNU & Berkeley Law School Joint Workshop
2016	The Use of Technology in Legal Practice	KBA-FCLRF Academic Conference (Jointly hosted by the Korean Bar Association and the Russian Federal Chamber of Lawyers)
2017	Artificial Intelligent Attorney	Korea University Brain Science Department Colloquium
2017	Multiple Agent Based Entailment System (MABES) for RTE	COLIEE 2017
2017	Ontology Modeling for Criminal Law	MIREL 2017
2017	Legal Content Fusion for Legal Information Retrieval	ICAIL 2017
2017	A.I.& Future	2017 International Ad Tec Conference
2019	The Applicability of Artificial Intelligence in International Law	2018 Busan International Advertising Festival
		YIJUN Institute of International Law

Major Accomplishments

2010	Establishing artificial intelligence legal convergence lab, The 1 st in Korea
2015	Developed i-US (Intelligent Legal Information System) and studying computational jurisprudence theory, The 1st in Korea
2016	Developed legal chatbot (Law-Bo), The 1st in Korea
2016	COLIEE, Competition on Legal Information ExtractionEntailment(Tokyo, Japan, 2016) Champion
2017	COLIEE, Competition on Legal Information ExtractionEntailment (London, UK, 2017) Champion
2017	Complete developing legal map algorithm, The 1st in Korea
2018	Received the Minister's Award for Contributions to the Advancement of Science and Technology
2018	Received the Grand Prize in the Legal Tech category at the '4th Korea Enterprise Awards'
2019	Received the Korea Excellent Patent Award
2019	Developed Asia's first contract analyzer (Alpha-Law)
2019	Received the Grand Prize in the Legal category at the Korea Artificial Intelligence Awards
2019	Selected as a Next-Generation World-Class Product (Ministry of Trade, Industry and Energy, KOTRA), Contract Analyzer (Alpha-Law)
2019	Received the Minister's Award from the Ministry of Trade, Industry and Energy at the Invention Patent Expo, Intelligent Legal Inference Search Engine (U-LEX)
2019	Received the Grand Prize (AlphaRo), Gold Prize (LawMeca), and Silver Prize (Ulex) at the Seoul International Invention Exhibition

Career Highlights

Year	Institution	Position	Remark
2012-2013	Seoul bar association	Member	Special committee on jurist training
2013-2014	Korea creative content agency	Consultant lawyer	Dispute mediation committee
2013-2015	Soongsil cyber university	Adjunct professor	Brain science and knowledge convergence
2015-Current	Korea bio-technology industry Association	Special member	
2015-Current	Korean bar association	Special member	Lawyer special committee for judicial reform
2015-Current	Convergence research institute for forensic safety	Research lawyer	Researching on AI safety system
2015-2016	Ministry of Science, Information & Communications Technology (ICT) and future planning	Consultant	A.I. Technology and policy
2016-Current	Korean Patent Attorneys Association (KPAA)	Vice-chairman	
2017-Current	Intelligence information strategy committee	Consultant	
	Intellectual Property Support Center (i-PAC)	Consultant	
2017-Current	Patent court	Lawsuit structure patent attorney	Infringement of patent/litigation for cancellation of a trial decision deputy
2016-Current	National assembly social contribution forum	Legal member	Study on AI legal policy
2016-Current	International association for artificial intelligence and law, IAAIL	Regular member	
2015-2017	Korean bar association	Vice president	48 th
2015-Current	Grad school of mass communications at Konkuk University	Adjunct professor	Artificial intelligence and media/copyright law
2018-Current	The National Assembly Library of the Republic of Korea	Consultant	
2018-Current	Korean association for artificial intelligence and law, KAAIL	Vice-chairman	
2012-Current	Intellicon law firm	Representative Attorney	
2019-Current	4th Industrial Revolution Commission (Presidential Organization)	Science and Technology Innovation Commission member	
2013-Current	Intellicon lab co., Ltd.	CEO	

APPENDIX

History

"Intellicon has developed AI technology for over 10 years."

History

"Intellicon has won many awards, including the AI World Championship."

Winner
Global Legal AI Competition Tokyo, Japan.

2023 ~

IP

"Intellicon holds about 20 AI-related IPs, including international patents."

"Technical Patents (Holding both domestic and international patents)."

Securing partnerships and footholds for global expansion.

Companies

- Acquired technical patents in Japan
- Japanese companies including Rosetta
- SoKandai University, Japan

Overseas Institutions

- International Legal Technology Association (Canada, Japan)
- Stanford LawSchool
- Alberta Univ (Canada) AMII

Domestic Univ.

- Yonsei University Industry-Academic Cooperation Foundation
- Ulsan University Industry-Academic Cooperation Foundation
- Ewha Womans University Law School
- Hanyang University Law School
- Chungnam National University Law School

< Core Tech >

- Legal Inference AI Technology / Multi-Agent RAG Technology / Legal LLM Technology
- Compatibility Technology for Knowledge Tech. & Legal Tech.
- Legal Network Knowledge Extraction Technology

NLP+ NLU+ LLM

- **Multi RAG Generative AI**
- **Multi-document Automatic Knowledge Extraction**
- **Legal Document Analysis**
- **Contract Analysis**
- **Legal Counseling Q&A Analysis**
- **Legal Precedent DB Analysis**
- **Legislative Revision Tracking**

Legal NLP

- Application of Legal Natural Language Processing (NLP) & Legal Linguistics
- Composed of General NLP + Legal Language Optimization Technology

Legal Logic-based Search Technology

- Technology that fuses multiple search models according to the semantic relationship between legal & general language, and the legal logical structure of sentences & search documents

Legal NLU

- Extracting information from sentences
- General Natural Language Understanding + Legal Element Extraction Technology

Core Sentence Recommendation Tech. within Document

- Technology that automatically finds & recommends intended clauses or important sentences within long legal sentences, (ex. laws & precedents), and highlights them

Adaptive Evolutionary Learning Technology

- AI continuously learns user question patterns & generated data to optimize
- Evolves like Google search, adapting to changes in the legal environment over time & with increasing data

Legal Inference & Ranking Technology

- Inferring the relationship between query documents & results through legal principles & logic
- Technology that ranks legal information based on the reliability of inference

Simulation-based Multi-information Concurrent Exploration Technology

- Technology that enables simulation of laws & exploration of related precedents
- Application of Computational Law & Meta Law Analytics theories
- Core technology of Intelligent Legal Optimization Search Engine

- Leading AI-based legal tech and securing global competitiveness
- Providing generative AI technology and solutions for augmented knowledge (API platform)

At a Glance

Core Solutions of Intellicon

Convergence System of Document AI & LLM

- Winner of the Gold & Special Prize at the Seoul International Invention Exhibition (2023)
- Solution that combines Document AI, RAG, & LLM
- Capable of analyzing Big Document Data in real-time
- Conversational AI that analyzes documents & converts them into knowledge
- Analyzes all types of documents regardless of file format

LawGPT

Asia's First Legal QA-LLM

- Legal QA system that provides answers to legal questions
- All answers are supported by evidence (laws, precedents, documents)
- Equipped with an optimized AI module that eliminates hallucinations
- Currently used by Korea Electric Power Corp(KEPCO), Korea Occupational Safety and Health Agency(KOSHA), law firms, and others

Legal Knowledge Network Simulation

- Internationally patented & World-Class Product selected
- Provides visual answers to legal questions
- Network of laws, precedents, commentaries, & papers
- Allows users to simulate knowledge structures directly

U-LEX

KOALLA(Law-specialized LLM)

Korea's First Legal Specialized LLM

- Fine-tuning technology for Legal RAG optimization
- Data re-normalization technology to reduce hallucinations
- Learning technology that incorporates user behavior data
- Model that can be developed to meet the specific needs of individual organization.

<ChatGPT>

- Vague answer
- No legal evidence provided for responses

Chat GPT

What offense is it to leave after a traffic accident by just giving a business card?

In a traffic accident, parties must provide their vehicle number and contact information. Giving a business card is possible but not recommended.

Failing to provide contact information can lead to legal issues, as it may be interpreted as intentionally causing an accident or evading responsibility.

After an accident, immediately contact the other party, assess the situation, and contact insurance companies. Neglecting this can result in legal consequences.

Provides highly precise answers based on Korean laws and precedents

Recommends or presents relevant legal provisions

Law GPT

질문:

What offense is committed by leaving after a traffic accident, only giving a business card?

entry

In a traffic accident, drivers must stop immediately and provide necessary assistance, as per Article 54(1) of the Road Traffic Act. Leaving after only giving a business card can constitute a hit-and-run offense under Article 5-3 of the Act on the Aggravated Punishment of Specific Crimes. If injuries occur, it may also violate Article 48 (duty of safe driving) and Article 148 (failure to take action after causing damage) of the same Act. (Reference: Supreme Court precedent)

Relevant Laws

Road Traffic Act, Article 54(1)
Act on the Aggravated Punishment of Specific Crimes, Article 5-3
Same Act, Article 156(1) No. 48
Same Act, Article 148

Summary

"Intellicon is the Top Leader in Generative AI & LegalTech"

- ✓ Secured AI source technology through 10 years of dedicated research
- ✓ Unparalleled technology born from winning the World Legal AI Competition (2016 in Japan, 2017 in the UK)
- ✓ Holds the most legal AI IPs, including international patents
- ✓ Ongoing expansion of client network to public institutions, law firms, and corporations
- ✓ Solution and consulting brand provided to public institutions such as the Constitutional Court, National Assembly, Gangwon Research Institute, Occupational Safety and Health Agency, and Korea Electric Power Corporation
- ✓ LawGPT technology that provides legal grounds (first developed in Asia, 2023)
- ✓ Multi-document based RAG-generative AI toolkit, DocuBrain (first developed in the world, 2023)
- ✓ Self-developed legal specialized sLLM (first developed in Korea, 2024)
- ✓ Holds the largest amount of legal big data in Korea (over 3.5 million cases)

Intellicon Meta Lab, self-developed 'Iris-7',

CEO Lim Young-ik, "Planned to be released for case law and statute search next year"

The 'Artificial Intelligence (AI) Lawyer' system developed domestically has won first place in an international competition testing AI's legal reasoning ability.

Intellicon Meta Research Institute (CEO, Attorney Youngik Lim) announced on the 16th that it won first place in the 'World Artificial Intelligence Law Competition (COLIEE, Competition on Legal Information Extraction-Entailment)' held at Keio University in Japan on the 18th of last month.

Meet Lex Rhim, Creator of South Korea's First Legal AI System, I-LIS

8th August 2017 artificiallawyer Legal AI in South Korea 0

Artificial Lawyer recently caught up with **Lex Rhim** founder of South Korean legal AI system i-LIS and CEO of **Intellicon Meta Lab** (pictured above). i-LIS is the first fully developed legal AI application in the country and it's great to see homegrown AI companies in the legal field sprouting up now all over the world.

Rhim kindly agreed to tell readers about the work he is doing in South Korea and what the latest version of his application will do, which at present focuses on legal research. Or, as Rhim puts it 'i-LIS is a legal navigation system'.

What does i-LIS 7 do?

i-LIS was developed by **Intellicon Meta Lab** and is the first Intelligent Legal Information system in Korea. Basically, i-LIS is an expert system for legal professionals. The main modules are the semantic retrieval-engine and the legal reasoning-engine.

i-LIS has a multiple information retrieval agent that can find precedents (cases), law, networks between laws and cases all spontaneously when asked.

Computers now capable of giving sage legal advice

July 08, 2017

At the Intellicon Metalab research institute, Lim Young-ik, attorney and developer, explains the operational control of the i-LIS legal AI. [Intellicon Meta Lab]

Participants from around the globe took part in a legal battle in London on June 13, pouring over pertinent laws for more than an hour. Most interesting of all, the competitors were computers.

The event was the highlight of the 16th International Conference on Artificial Intelligence and Law (Icail), which focus on the practical application and development of AI. South Korean Intellicon Metalab's i-LIS (Intelligent Legal Information System) has been the victor for two consecutive years.

Intellicon Meta Research Institute for Legal Technology Succeeds in Developing AI Legal Map

Reporter Hong In-gil | Input: 2017/12/28 18:30

A legal map developed by Intellicon Meta Research Institute, a legal tech company.

Intellicon Meta Research Institute, a legal tech company (CEO Lim Young-ik, Konkuk University Graduate School of Journalism and Public Relations), announced that it has completed the Legal Map, the first in Korea to express the connection structure of all laws in Korea. The Legal Map developed by Meta Research Institute can visually confirm the complex interconnections of all laws in Korea, and by looking at the Legal Map, one can easily identify the information on the desired law and other laws that are most similar or related to that law. Intellicon Meta Labs is introducing U-LEX, a legal navigation system that allows anyone to easily and accurately find laws by combining its self-developed intelligent legal reasoning engine, Iris-7, with the above legal map.

An official from Intellicon Meta Research Institute explained, "This system is a

Data Promotion Agency

The Korea Data Promotion Agency has been implementing the 'Good Content Service' certification project since 2013 to improve the quality of domestic content services. The 'Good Content Service' certification, which was conducted three times this year, selected services in various fields such as e-learning, music, publishing, comics, broadcasting, travel, shopping, and finance. The number of services that received certification increased by 16% from 197 last year to 228. In particular,

서비스 개요

Law-Bo는 국내 최초의 지능형 법률 도우미로서, 생활 속 법률 이슈에 대한 궁금증을 신속하게 해결해 드립니다.

최근, 2016년 9월 시행된 '형량공시법' 이슈에 대한 법률 상담 서비스를 제공하고 있습니다. 기량하에서도 다양한 법률 관련으로 복잡하여, 사용자가 손쉽게 자신의 법적 문제 상황에 대한 법률 상담을 받을 수 있습니다. 또한 각 법적 질문에 대한 추론 단계 및 결론에서, 판단에 도움이 되는 보충설명과 결론에 대한 추론 단계도 자세하게 제시합니다.

로보는 형량금지법 외에도 앞으로 이혼, 상속, 교통사고, 부동산, 공상거래법 등으로 지능형 콘텐츠서비스를 확대해 나갈 예정입니다.
